CAREER OBJECTIVE:

Full Stack Developer passionate about building scalable, high-performance web applications. Skilled in **Next.js**, **TypeScript** and **modern backend** technologies. Focused on clean architecture, optimized performance and thoughtful problem-solving. Driven to join a **growth-oriented team** and continuously sharpen technical expertise.

SKILLS:

Technical Expertise:

- **Frontend:** JavaScript (ES6+), React, Next.js, TypeScript, Tailwind CSS, HTML, CSS, Firebase, Better Auth
- **Backend:** Node.js, Express.js, MongoDB, Mongoose, Prisma, PostgreSQL
- **State Management:** Redux Toolkit, RTK Query
- **Others:** JWT, Socket.io, REST APIs, Payment Integration, AI Integration

Familiar With: MySQL, Cloudinary, MUI, Framer Motion

Tools & Platforms: GitHub, VS Code, Vercel, Netlify, Chrome DevTools, Figma, Linux

Soft Skills:

- Problem-Solving & Critical Thinking
- Communication & Team Collaboration
- Time Management & Task Prioritization and Leadership in Team Projects
- Agentic Workflows

RELEVANT PROJECTS:

Cartora – E-Commerce Platform (Full Stack)

[Live Preview](#) Github: [Client](#) – [Server](#)

A full-featured e-commerce platform built for a premium shopping experience, offering product browsing, secure checkout, order tracking, and a complete admin analytics dashboard.

- Developed full-stack architecture using Next.js 16 (App Router), TypeScript, TanStack Query, and Stripe Elements
- Implemented secure checkout with Stripe payments, address management, and real-time order tracking
- Built admin dashboard with revenue charts, order frequency graphs, and category breakdowns using Recharts
- Developed product catalog with search, filtering, image galleries, and variant selection
- Implemented real-time purchase notifications and Google OAuth authentication

Technology Used – Next.js, TypeScript, Tailwind CSS, TanStack Query, Stripe, Framer Motion, Recharts.

StartupForge (Startup Collaboration Platform)

[Live Preview](#) Github: [Client](#) – [Server](#)

A full-stack platform where founders publish startups and post collaboration opportunities, while collaborators browse open roles, apply, and track their applications.

- Role-based dashboards for founders, collaborators, and admins with tailored workflows.
- Secure authentication with email/password and Google sign-in via Better Auth.
- Stripe-powered premium checkout flow for founder account upgrades.

Technology Used – Next.js, React, TypeScript, Tailwind CSS, TanStack Query, Better Auth, Stripe, Axios.

HabitPilot (AI Habit Tracking Platform)

[Live Preview](#) Github: [Client](#) – [Server](#)

HabitPilot is an AI-driven habit tracking platform where agentic AI models design, analyze, and creates user routines. Built with Next.js and Groq's Llama 3.

- AI onboarding flow that generates tailor-made habit plans per user
- Interactive dashboard for habit logging, check-ins, and live stats
- Public habit explore feed with clone-and-customize functionality
- Admin panel with MRR analytics and signup growth graphs
- JWT authentication with refresh tokens and Google OAuth
- Stripe subscription billing with webhook handling

Technology Used – Next.js, React, TypeScript, Tailwind CSS, Express.js, MongoDB, Groq Cloud API, Stripe, Recharts.

Education

North Western University, Khulna

Bachelor's in Computer Science & Engineering (CSE)

2024 – Present

PROFESSIONAL COURSES:

Complete Web Development Course | [Programming Hero](#) | December 2025 – June 2026

CERTIFICATIONS:

Frontend Developer (React) Certification | [HackerRank](#)

LANGUAGES:

Bangla (Native), English (Fluent)
